

# VEGA lightbar with red / green lights

Version for Airport

- Aerodynamic, thin lightbar, a height of only 67 mm
- Robust, aluminium frame and polycarbonate lens
- Reduction of vehicle's aerodynamic drag and therefore its fuel consumption
- Optimal installation with adjustable fixing system
- R65 High brightness LED lighting – R65 Class 2 approved
- Very low electrical consumption

## Technical specifications

- |                                                                                                                                                              |                                                                                                                                                                                                          |
